

Dolphin Activity Page

Did You Know....

- Dolphins are in the order Cetacea, family Delphinidae. That means that all dolphins are whales, but not all whales are dolphins!
- There are ~37 species of dolphins - plus subspecies and ecotypes!
- Dolphins can be found in every ocean.
- Dolphins range in size from ~4 ft (1.2 m) to ~30 ft (9.1 m).

- Label the dolphin's body parts (see Dolphin Anatomy Activity, as needed)
- Shade/color according a dolphin species of your choice.
